

# The heavy-duty package from BPW. Greatest reliability for the toughest surfaces in the world.

Heavy-duty delivers maximum performance. That is precisely what BPW is offering with its heavy-duty package for transporting heavy loads on poor roads. From the reinforced axle beam through to the heavy-duty air suspension, this BPW running gear delivers significantly improved driving comfort and safety even on the toughest terrain. For example, heavy-duty air suspension is a requirement of off-road applications today, e.g. in Eastern Europe, Africa or the Middle East.

Truck/trailer combination with heavy-duty air suspension

## BPW heavy-duty air suspension – Features and benefits

- ▶ Robust construction
- ▶ Reinforced axle beam (120x15 or 150x16 mm)
